electrical contractors

8 March 2005.

Derek Shore ,
Cavity Access,
1a St.Cuthberts Road
Southport.

Evaluation report on Cavity Master.

Derek,

Thank you for the opportunity to site test the Cavity Master tool, an opportunity to use the tool came up almost immediately . The job involved routing a cable across two floor levels via a gap behind new kitchen units into a sub floor area. In this instance your tool enabled me to create a hole large enough to work in and the ability to get a hole cut that you can work in plus the speed in which you can cover that hole up again I found it to be an invaluable labour saving tool.

The ability to cut an access that you can readily cover over I found to be invaluable as a way to quicken installation time and as a tool to get you around a problem as in the instance above it saved me a lot of time in a awkward situation.

Once again thank you for the opportunity to use the tool it will always be close to hand.

Yours Sincerely,

Paul Battle. (proprietor)
