Supplier

**Cavity  
Master**

**Cavity  
Access**

Tools designed by Tradesmen for Tradesmen  
UK & US Patents Granted

The **Cavity Master** has been borne out of years of lifting and then having to repair or replace particle or chipboard flooring to gain access to services, then having the time consuming job of repairing the floor usually without success!

At last we at **Cavity Access** have solved this problem. By using the **Cavity Master** tool, floors and wall spaces are quickly opened and sealed with the **Cavity Master** closure plate. The opening and closing of the floor or wall can be accomplished in 2 minutes. The **Cavity Master** works equally well on floorboards or any wooden material.

The saw blade is easily replaced and the tungsten carbide rebate cutters are good for many years of service making the **Cavity Master** a tool that will be in your toolbox for many years to come.

### Instructions

Always use goggles when using power tools.  
 Always use a drill with a side handle.  
 A drill rated at 600W or higher is recommended.  
 Medium drilling speeds will give the best results.  
 Use cavity waste removal tool to eject waste.  
 Cavity Access closure plate should be sealed with silicone.  
 Always make sure the area to be cut is nail free.

## Without Cavity Master

Time consuming, costly, awkward and unstable

Are you still cutting up flooring to access key services before repairing the hole in a time consuming manner?

Cut a large hole with a jigsaw to gain access

How often have you finished a job only to find you have nothing to support the replaced section of flooring?

Repair by supporting the boards on each side

Even when the space is finally covered how strong will it be, how long will it last?

There is a better way, a cleaner way and importantly a cost effective way.

Finally screw down the replaced section securely

Why waste time and effort when one tool can do it all?

The **Cavity Master** has been designed by tradesmen for tradesmen. One tool to save you time and money.

## With Cavity Master

Quick, easy, cost effective and secure

The **Cavity Master** is ideal for gaining access to various services in seconds.

Cut the hole with the Cavity Master in seconds

Electrical supplies are within easy reach through a **Cavity Master** access hole.

The introduction of plastic pipe in conjunction with the **Cavity Master** makes plumbing installations quicker and therefore more profitable.

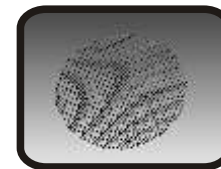

Cables or pipes are accessible via the hole

**Cavity Master** can also be used to provide access to stop taps.

Even plastered walls are easily negotiated. The **Cavity Master** access hole can be created and then covered with the specially designed wire plaster plate. Final plastering make the job quick, clean and simple.

The hole is sealed with the cavity cover plate

Particle flooring, chipboard or plastered walls are easily opened up for electrical supplies, plumbing or even ventilation. The custom made cavity closure plates are solid coated, and also available as a ventilation plate or plasterboard mesh.
